Kaana™ v0.1

Straights are overrated!
Kaana is a display typeface for Devanagari and Latin built from straight lines, sharp curves, and triangular cuts. The shapes repeat, turn throughout the design, creating a bold & playful visual language.

Designed by	–	Kimya Gandhi, Pranavi Chopra, Rob Keller
Beta Version	–	0.1
Released	–	9 June, 2026

Kaana Character Set 0.1

Kaana Beta 0.1 contains exactly 399 glyphs. The Devanagari has rakar forms, frequently used akhand conjuncts and some linear conjuncts. The next versions will have more exhaustive conjuncts, language alternates. But the stylistic feature to make zigzag kaana is there! Also included are several graphic oddities to play around with!

THANK YOU♥!

...for trying out this beta font of Kaana!
