Lini™ Beta 0.4

Lini is a balancing act between style and legibility – typographic form and function. It is about as compressed as possible, for typical medium to large typesetting, while remaining quite legible. So while this design is not intended for setting small text, it is awesome for eye-catching headlines & titles. Use it anywhere from names at the bottom of film posters to fun graphic tees!

Designed by – Kimya Gandhi
Beta Version – 0.4
Updated – 26 October, 2022
Styles – 5 Fonts, Thin, Regular, Medium, Bold, Extra Bold

Lini!

Lini is a super condensed contemporary Devanagari & Latin typeface with not-so-regular proportions. The third update for Lini has many new glyphs along with a brand new Bold weight! There are new iMatra lengths, along with extensive language support for Latin. Try it out and tell us what you think?
